

Harus Ho

1210-50 Brian Harrison Way, Toronto, ON, M1P 5J4 • (437) 961-1966 • harusho@singlebit.smail.me

[GitHub](#) • [LinkedIn](#) • [Portfolio](#)

Result driven software developer with 4 years of hands-on experience enhancing and maintaining enterprise-scale system. Proven ability to collaborate with cross functional team and internal users to clarify system requirements to deliver timely, high quality, bug-free enhancement.

Experience

JAN 2025 - PRESENT

I have been working on several projects since my graduation in December 2024. During the period, I handled the tasks across frontend, backend, and database management. Upon this moment, I have deployed two websites and two backend applications to a cloud service, Heroku. Beyond that, I am learning Rust and Python to broaden my skill set.

SEP 2019 – JUNE 2023

Analyst Programmer | YF Life Insurance International Limited | Hong Kong

- Enhance and optimize enterprise-scale back-end application, which providing APIs accepting and returning data in JSON format.
- Design and deliver front-end application by using HTML, CSS, and Angular. Architect and implement relational database schema, including table creation and development of optimized stored procedures for data manipulation and retrieval.

Skills

Python • C# • Java • SQL • JavaScript • TypeScript • DotNet Core • React • Angular • Entity Framework Core • Linux • Microsoft Windows • MacOS • Microsoft SQL Server • PostgreSQL • Oracle Database • MongoDB • Analytic Skills • Communication • Problem-Solving • Teamwork • English • Cantonese • Mandarin
